PROFILE

- Computer Science graduate and UI/UX Developer skilled at creating easy-to-use digital experiences. Completed UI/UX training at ITI, building responsive projects with Vue.js. Also experienced with .NET and ASP.NET Core for complete web development.

EDUCATION

Shorouk Academy 2020 – 2024
Bachelor of Computer Science (Grade: Very Good)
Graduation Project: E-Book Application with Chatbot and Semantic Search (Excellent)

INTERNSHIPS

Intensive Code Camp July 2025 – Nov 2025

- **Track:** UI UX development
- **Information Technology Institute (ITI):** Cairo University

PROGRAMMING SKILLS

- **Languages:** HTML5, CSS3, JavaScript, TypeScript, XML, C#, C++, Python, C, Java
- **Frontend Technologies:** React.js, Next.js, jQuery, Bootstrap, Tailwind CSS, Sass, Vue.js
- **UI/UX Design:** Figma, Illustrator, Photoshop; Wireframing, Prototyping, Information Architecture, User Research
- **Backend & Databases:** Node.js, ASP.NET Core, Microsoft SQL Server
- **Technologies:** Git/GitHub, RESTful APIs, IdentityServer, ASP.NET Identity, Visual Studio
- **Testing:** Unit Testing, Integration Testing, Postman
- **Software Design:** OOP, Design Patterns, Agile, Data Structures, Algorithms

COURSES

- **UI/UX Route Academy Diploma:** UI/UX design, Figma, wireframing, Adobe tools, and information architecture, wireframing, sketch, Figma, Adobe Photoshop, and Adobe Illustrator 2025
- **Problem Solving:** Algorithms fundamentals including sorting, binary search, and greedy techniques using C++. 2022
- **Backend .NET Route Academy Diploma:** C#, ASP.NET Core, SQL Server, Entity Framework, LINQ, and system design basics. 2024
- **React Advanced Bootcamp – Elevate:** Hands-on projects using React and Next.js with APIs, state management, and Agile workflows. 2026

PROJECTS

- **Graduation Project: Chatbot Integration in Ebook App:** Developed and integrated an AI-powered chatbot into an ebook application using Python and NLP techniques and machine learning algorithms to enable conversational interactions within the app. Designed and implemented the chatbot to assist users with queries, recommend books, and provide personalized reading suggestions based on user preferences.
Technologies Used: Python, Natural Language Processing (NLP) libraries (e.g., NLTK, spaCy), Machine Learning algorithms (e.g., LSTM, Naive Bayes), Ebook app development tools, Git for version control.

2024

- **ITI Projects — UI/UX & Frontend Development:**
 - **Memory Game:** Interactive matching game using TypeScript with DOM manipulation and event handling
 - **Admin Dashboard:** Responsive dashboard with charts and user management using Vue.js and Tailwind CSS
 - **PWA To-Do List:** Progressive Web App with offline support and local storage synchronization
 - **Portfolio Website:** Personal portfolio with Sass architecture, animations, and responsive design
 - **Responsive Website:** Modern landing page using Tailwind CSS with clean UI
 - **Website Redesign:** Redesigned Edraak website improving UI/UX using Figma
 - **Node.js CRUD:** RESTful API with full CRUD operations and validation
 - **AI Chat Integration:** Developed a real-time chat application using Google’s Gemini AI API, featuring natural conversations, message history, and support for various query types. Built with JavaScript and responsive UI design.
 - **Tashtebaty – Home Services Platform (Graduation Project):**
A full web platform that connects customers with technicians and service companies in plumbing, electricity, carpentry, and finishing services. The system provides secure user authentication, role-based access (Admin, Technician, Company, Customer), real-time order tracking, online payments, and an AI-powered assistant to help customers describe their problems by analyzing images.
Key Features:
 - * Service booking for technicians and companies with scheduling and location-based suggestions.
 - * Real-time order tracking with status updates, push notifications, and chat between customer and technician.
 - * Online payments integrated with PayMob and email notifications via SendGrid.
 - * Technician dashboard for managing orders, availability, services, earnings, and reviews.
 - * Admin dashboard for managing users, providers, orders, offers, payments, and platform analytics.
 - * AI image analysis to auto-generate service descriptions for customers.
 - * Fully responsive UI using Vue.js and Tailwind, with dark mode support.**Technologies Used:** Vue.js 3, TailwindCSS, Firebase Firestore, Firebase Auth, PayMob API, Gemini API, Chart.js
- **ERP Web Application :** Responsive ERP system covering CRM, project management, task tracking, finance, accounting, messaging, reports, archiving, account settings, and member management using Vue.js 3, Chart.js and ECharts, Tailwind CSS 2026
- **Furniture E-Commerce Website:** A responsive e-commerce platform built with Vue.js 3 and Tailwind CSS, featuring an interactive product catalog and user authentication (login/signup pages) 2025
- **Next.js Exam Application:** Role-based exam system built with Next.js 16 (TypeScript strict mode) featuring authentication, admin/user dashboards, Integrated React Query for data fetching and React Hook Form with Zod for validation, styled with Tailwind CSS. 2026
- **Backend Projects:**
 - **E-commerce Store API (ASP.NET Core):** Complete e-commerce platform with Stripe payments, JWT authentication, and basket management 2024
 - **Hospital Management System (ASP.NET Core MVC):** Comprehensive system with role-based access (Admin, Doctor, Patient) and appointment scheduling 2024
 - **Company Management System (ASP.NET Core MVC):** Web-based system for managing departments, employees, and user roles 2023

SOFT SKILLS

- **Communication:** Strong communication skills and an ability to collaborate effectively with cross-functional teams.
- **Adaptability:** Eagerness to learn and adapt in a fast-paced environment.
- **Problem-Solving:** Problem-solving mindset with attention to detail.

LANGUAGES

- **Languages:** Arabic (Native) - English (Upper Intermediate)
